PROFESSIONAL EXPERIENCE

Epapa **Berlin, Germany**

Backend Developer Intern **Sep 2024 – Dec 2024**

- Served as the sole backend developer, setting up and managing application environments (Development, Staging, Production) using Docker, ensuring seamless performance and consistent application behavior.
- Designed and implemented complex RESTful APIs, enhancing functionality for user authentication, password management, and AI integrations, and documenting them comprehensively using Swagger.
- Configured and optimized Azure Database for PostgreSQL, ensuring high availability with regular backups and efficient operations through database schema optimization, and maintained a scalable and reliable infrastructure.
- Deployed web applications using Azure Web Apps and managed CI/CD pipelines through Azure DevOps, accelerating deployment cycles and improved release processes.
- Collaborated with cross-functional teams to ensure seamless integration of backend services, enhancing project alignment and overall user experience, and facilitated effective communication and issue resolution.
- Successfully deployed a mobile app to the Google Play Store, overseeing backend infrastructure and managing DNS setups for secure integration with Azure services, and ensuring smooth and secure user experience.

EDUCATION

University of Sheffield | Sheffield, United Kingdom

MSc in Advanced Computer Science **Sep 2023 – Jan 2025**

- Relevant Coursework: Object-Oriented Programming and Software Design, Software Reengineering, Software Development for Mobile Devices, Testing and Verification in Critical Systems, Computer Security and Forensics, Intelligent Web

Jain (Deemed-to-be) University | Bengaluru, India

BTech in Software Engineering | CGPA: 9.33 **Aug 2019 – June 2023**

- Honors: Ranked 1st in class, awarded Gold Medal in Software Engineering
- Relevant Coursework: Object-Oriented Analysis and Design, Web Technologies, Agile Software Development, Mobile Application Development, Software Security, Software Project Management, DevOps

SKILLS

- **Front-end Development:** Java | JavaScript (ES6+), TypeScript | React, Next.js | Tailwind CSS, Redux Toolkit**;** Built responsive SPAs with component-driven design
- **Back-end and APIs:** Node.js, Express | Python (Flask, FastAPI) | RESTful API design, OAuth/JWT authentication**;** Tested endpoints using Postman & Swagger
- **Mobile and Real-Time:** React Native, Android Studio, Kotlin | Socket.IO for live chat features
- **Databases:** PostgreSQL, MongoDB, MySQL, SQLite | Schema design & performance tuning
- **Cloud and DevOps:** Azure, Firebase | Docker, Kubernetes | CI/CD (GitHub Actions, Jenkins)
- **Architecture and Performance:** Progressive Web Apps (PWA), Responsive design, Modular components, SOLID principles, clean code (KISS, DRY, YAGNI)
- **Development Practices:** Agile methodologies, Test-Driven Development (TDD), Version control (Git, GitHub, GitLab)
- **Tools and UX:** Jira, Figma

ACADEMIC PROJECTS

E-Waste Management System | Python, Node.js, Flask, MYSQL, RESTful API
Built RESTful APIs using Python, Node.js, Flask, and MySQL to automate authentication and data handling, boosting efficiency by 30%. Integrated third-party resale platforms and secured access with JWT authentication.

Plant Recognition Application | ***Node.js, Express.js, MongoDB, DBPedia, Figma, Bootstrap, IndexDB, PWA***
Designed a responsive UI with Figma and Bootstrap, and built a cross-platform PWA using Node.js and Express.js with offline support via IndexedDB.

Geolocation-Aware To-Do App | Android Studio (Kotlin), Room Database, Google Maps API, Jetpack Compose
Built a location-based task manager in Android Studio (Kotlin), using Room Database and Google Maps API for real-time geospatial features, enhancing usability and reducing load times by 25%.

SPYPARK | ***Android Studio, Java/Kotlin, Firebase, SQLite, Google Maps API***
Created a real-time parking availability app in Android Studio using Java/Kotlin, Firebase, and Google Maps API. Implemented secure data storage with Firebase and integrated live navigation for a seamless user experience.

PERSONAL PROJECTS

Ai Article Summarizer | React JS, JavaScript, Tailwind CSS, Vite, Redux Toolkit, Rapid API
A modern web app that generates concise summaries of long-form articles with a single click using OpenAI's language model, featuring a clean UI and seamless API integration.

PricePulse: E-Commerce Tracking Application | Next.js, Typescript, Tailwind CSS, MongoDB, Nodemailer
Implemented continuous web scraping with proxy rotation to monitor product pages, maintained historical price data, scheduled automated cron jobs for 24/7 checks, and integrated email alerts for price drops and restocks.

PATENTS

Co-inventor | Quick Fill Using Sky Locker and Digital Storage **Published: July 8, 2022**
Patent Office: India | Application Number: 202231031977
Description: Streamlines secure document uploading with secure SSO authentication for enhanced productivity.

PUBLICATIONS

Co-author | SPYPARK: The Innovative Mobile Application for Online Parking System - ***IEEE (Institute of Electrical and Electronics Engineers)*** **Published: June 27, 2024**
Description: Presented the design and practical impact of a mobile app that optimizes urban parking through real-time updates and reservation management.

EXTRA – CURRICULAR ACTIVITES

Student Placement Coordinator, Jain (Deemed-to-be) University **Jan 2022 – May 2023**

- Increased student placement rates significantly by developing and implementing training programs focused on soft skills and industry-specific knowledge, improving employability and career transitions.

Organizer, HACKELITE **Sep 2022 – Jan 2023**

- Led cross-functional teams to plan and execute a university-wide hackathon, attracting 200+ participants and fostering innovative solutions to real-world problems.

Secretary, FOSS Club **Aug 2021 – Dec 2022**

- Led conferences and events to promote student engagement in open-source initiatives.
