PROFILE

Experienced MSc graduate with hands-on experience in backend development, API design, database optimization, and cloud deployment using Docker, Azure, and Kubernetes. Built production-ready full-stack applications with React, Next.js, and PostgreSQL, and contributed to AI model integration in real-world projects. Actively learning German (A2), open to relocation to Germany, and EU Blue Card eligible.

PROFESSIONAL EXPERIENCE

Backend Developer Intern

Epapa | Berlin, Germany (Remote from United Kingdom) **Sep 2024 – Dec 2024**

- Developed Dockerized backend environments (Development, Staging, Production), reducing release time by 30% through consistent deployments.
- Designed and documented secure REST APIs (authentication, password, AI integration) with Swagger, boosting cross-team adoption.
- Optimized PostgreSQL on Azure with schema tuning and automated backups, cutting query latency by ~25%.
- Built CI/CD pipelines using Azure DevOps, accelerating release cycles and improving test feedback.
- Collaborated with frontend and AI teams to integrate features, resolving deployment issues and ensuring smooth mobile releases to Google Play Store.

Freelance Full-stack and AI Developer | Remote **Jan 2025 – Present**

- Designed AI-powered web prototypes with fine-tuned LLMs (GPT, Gemini), integrated into full-stack apps.
- Enhanced LLM accuracy on programming and voice datasets, improving benchmark performance by ~15%.
- Evaluated multiple LLMs and delivered optimization recommendations, improving reliability in production use.
- Contributed to Agile teams via code reviews and iterative feature delivery, ensuring timely delivery.

EDUCATION

MSc in Advanced Computer Science | University of Sheffield **Sep 2023 – Jan 2025**

Sheffield, United Kingdom

BTech in Software Engineering | Jain (Deemed-to-be University) **Aug 2019 – Jun 2023**

Bengaluru, India | CGPA: 9.33 / 10 | Gold Medal, Ranked 1st in cohort

SKILLS

- **Programming & Frameworks:** Java, Python, JavaScript (ES6+), TypeScript, Node.js, Express, React, Next.js, Flask, Tailwind CSS
- **APIs & Security:** REST, FastAPI, OAuth/JWT, API documentation (Swagger, Postman)
- **Databases:** PostgreSQL, MongoDB, MySQL, SQLite (Schema design and performance tuning)
- **Cloud & DevOps:** Azure, Firebase, Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins)
- **Architecture & Practices:** Progressive Web Apps (PWAs), Modular Components, SOLID principles, Clean code (KISS, DRY, YAGNI)
- **Workflow & Tools:** Agile/Scrum, Test-Driven Development (TDD), Git (GitHub, GitLab), Jira, Figma

PERSONAL PROJECTS

Ai Article Summarizer | React JS, JavaScript, Tailwind CSS, Vite, Redux Toolkit, Rapid API

- Summarizes long-form articles using OpenAI models with responsive UI, achieving >90% key-point accuracy.
- Designed modular frontend architecture for scalability and fast rendering.

PricePulse: E-Commerce Tracking Application | Next.js, Typescript, Tailwind CSS, MongoDB, Nodemailer

- Automated price tracking with web scraping, proxy rotation, scheduled cron jobs, and sends real-time email alerts for price changes, improving user savings and engagement.

ACADEMIC GROUP PROJECTS

E-Waste Management System | Backend Developer | Python, Node.js, Flask, MYSQL, REST APIs, JWT

- Implemented secure JWT authentication and APIs for device verification, reporting, and notifications.
- Developed backend features enabling staff to verify devices, update details, and classify items (e.g., recycle, rare, current) and automated workflows that reduced reporting time by 40% and improved staff efficiency.

Plant Recognition Application | Fullstack Developer | Node.js, Express.js, MongoDB, IndexedDB, PWA, Figma, Bootstrap

- Built offline-first PWA with IndexedDB syncing to MongoDB when online.
- Added real-time plant recognition features, improving cross-platform usability.

LANGUAGES

- **English:** Fluent (C2)
- **Hindi:** Native
- **German:** Beginner (A2, actively learning)

PATENTS & PUBLICATIONS

- **Patent:** Co-inventor - **Quick Fill Using Sky Locker and Digital Storage**, India (Published Jul 2022, Application Number: 202231031977)
- **Paper publications:** Co-author - **SPYPARK: The Innovative Mobile Application for Online Parking System**, IEEE (Published Jun 2024)

EXTRA – CURRICULAR ACTIVITES

Organizer, HACKELITE **Sep 2022 – Jan 2023**

- Led team to organize a university-wide hackathon with 200+ participants.

Secretary, FOSS Club **Aug 2021 – Dec 2022**

- Organized workshops and events promoting open-source contribution and community engagement.
